Abstract of EP0339363

In a hand shower having a temperature measurement device and a temperature display which is arranged in the region of the side wall between the shower floor having jet outlet openings and the rear, it is proposed for the sake of improvement that the measuring device be arranged in a special housing which can be inserted in an opening in the region of the side wall and be provided with a temperature sensor in an inlet chamber of a switching valve for switching over the water stream to separate jet outlet openings.
